

# Wrought Iron

## Kirsch®

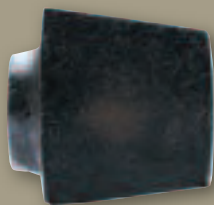

The new Wrought Iron update adds two compact finials to the Kirsch® collection of traditional ornate wrought iron finials. Two new petite finials expand the versatility of this collection for more contemporary applications. In addition, there are several solution based accessories including a C-Ring, C-Ring Baton and Center Bypass Bracket which work together as a solution for large windows... allowing drapes to be drawn past the Center Bypass Support Bracket. Finally, there is a new Inside Mount Socket that allows the rods to be used for alternative mounting and applications.
